

~~ABSTRACT~~

material, ~~said system comprising~~ ^{includes a} fixing means between the die (1) and a die-holder

surface or cylinder (2) around which the die (1) is arranged, wherein the ~~fixing~~ ^{fixing}

~~means~~ ^{fixing element} include a plurality of bolts (3) actuated by an actuator (5) housed inside a

hollow body (8) fixed to the die-holder cylinder (2) in order to provide for a

rapid fixing of the rotary die to the die-holder cylinder.
